

Lokanath Panda

Software Development Engineer | lokanathpanda128@gmail.com | 8144496407 | Bhubaneswar

Professional Summary

Software Engineer with 1.2 year of experience building scalable web applications. Proficient in React.js, Next.js, Python Fast API, AWS. Delivered 10+ production platforms with REST APIs, LLM APIs, role-based access control, and CI/CD pipelines.

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS

Backend: Python FAST API

DevOps: AWS EC2, CICD, Git

Database: MongoDB, DynamoDB, PostgreSQL

Professional Experience

Software Development Engineer -1, Hirekarma Pvt Ltd, Bhubaneswar, June 2025 - Present

SOLVIQAI- AI Placement Simulator | *Python Fast API, Next.js, TypeScript, PostgreSQL, AWS, Cohere*

- Integrated Disha job portal with SOLVIQAI via SSO token validation, assessment packages, and result webhooks for seamless partner-driven hiring simulations.
- Engineered AI question generation using Cohere LLM with fallback logic for aptitude, soft skills, coding, GD, and AI interview rounds across multi-round placement packages.
- Designed proctored exam UI (Fullscreen mode, question navigator, timers) with webcam monitoring and snapshot uploads for exam integrity.
- Delivered scoring and reporting module with round-wise analytics and automated result push to Disha after assessment completion.

DISHA - Job Portal | *Python Fast API, Next.js, TypeScript, PostgreSQL, AWS*

- Built end-to-end campus hiring workflow- corporate JD creation- admin university assignment- university approval- student applications (portal and tokenized public JD links)- shortlist/reject with SOLVIQ assessments and manual screening- offer letter upload and tracking.
- Integrated SOLVIQ assessment platform with JWT-based student access, automated result callbacks, and corporate/university pipelines so recruiters can run structured tests alongside manual shortlisting.
- Developed resume builder with live preview and export, plus AI-powered resume/career-align analysis to help students improve profiles before applying.
- Led multi-role platform (student, university, corporate, admin) on Next.js and Fast API with PostgreSQL multi-tenancy, role-based dashboards, analytics, and AWS EC2 deployment.

Software Development Engineer Intern, Tekkzy, Bhawanipatna, June 2022- May 2025

CODE GENERATOR - Café Management System | *Python Fast API, React.js, DynamoDB, AWS*

- Built a custom low-code platform where users fill a web form and a fully functional, deployed cafe management website is automatically generated- including separate admin and customer-facing dashboards.
- Engineered real-time order flow: customers place orders from the customer dashboard, Kitchen Tickets (KT) are instantly generated in the admin panel with alerts, and invoices are auto-generated upon payment completion.
- Developed an analytics dashboard for admins to monitor revenue trends, order volumes, and performance metrics across time periods.
- Integrated AWS Cognito for secure authentication and implemented branch-based CI/CD pipelines for automated deployments across environments.

SUBSCRIPTION-BASED PAYMENT & BILLING SYSTEM | *Python, DynamoDB, AWS Lambda function*

- Developed a complete subscription and payment lifecycle system - from invoice generation and scheduled payment reminders to automated email/SMS notifications and digital bill receipt delivery.
- Built automated workflows for invoice reminders, payment confirmation triggers, and receipt dispatch, reducing manual overhead in the billing process

Education

B. Tech, Computer Science Engineering

Government College of Engineering Kalahandi, Odisha (2021- 2025) (CGPA: 8.28/10)
